## 1 Introduction

Bigger Piggy Bank is a 5x3 reel 10 winline game

## 2 How to Play

Spin the reels by pressing the 'SPIN' button to try to achieve 3, 4 or 5 of a kind reel wins.

Select the 'CHANGE STAKE' button to increase or decrease the size of the bet.

### 2.1 Autoplay

Press the 'AUTOPLAY' button to see the options. You must select the number of autoplay games, and your loss limit, before you have the option of starting the autoplay.

'Custom Loss Limit' refers to how much money you wish to lose before the auto play stops. For example, if you have £50 in your balance, and you choose a £20 loss limit, the auto play will stop as soon as your balance goes below £30, even if you have auto play games remaining.

You can either choose to accept the suggested loss limit, which is your stake multiplied by the number of autoplay games you have selected, or manually type in a loss limit by pressing the 'Custom Loss Limit' button.

Choose the 'More settings' option if you wish to stop the autoplay when you win over a certain amount.

Select the 'AUTOPLAY' button during autoplay to stop them.

### 2.2 Turbo Mode

Enabling 'Turbo Mode' increases the speed of a game by speeding up the reel spin animation. This does not impact the outcome of the game.

## 3 Game Rules

Match 2,3, 4, or 5 symbols across a valid win line to achieve a win.

All games are played with 10 win lines.

Wins can occur across any or all the win lines.

Only the highest award is paid per winning combination.

All wins pay left to right on adjacent reels starting with the leftmost reel.

Wins on different played lines are added.

Your winnings will be credited to your account immediately.  
You will lose your bet amount if you lose the game.

To play Spin Chance, select the ‘PLAY’ button to begin moving the pointer across the meter. Alternatively, select the ‘NO THANKS’ button to exit Spin Chance with the remaining credit. If the pointer stops on the green segment, a spin at the current bet is awarded and plays automatically.

If the pointer stops on the red segment, the player loses any remaining credit and exits to the base game.

The red and green segments are proportional to the amount of credit in relation to the current bet. The chance of winning a spin is determined by this ratio.
