VOLATILITY LEVELS™

Choose your favourite game style

Low volatility: The payouts you receive in this mode are more frequent but in most cases smaller. This level is perfect for players who prefer shorter game sessions.

Standard volatility: This mode is a mixture between Low and High and is dedicated to players who are looking to feel the thrill of big wins in a fair frequency.

High volatility: In this mode you can hit BIG WINS but they are not as frequent as winning in Low mode. High is an excellent mode for players who are not afraid of taking a risk to win big.
