REGLAS DE JUEGO

MIGHTY SYMBOLS CROWNS

JOKERBET

Mighty Symbols™: Crowns

- The game has 5 reels, 3 rows and 10 fixed bet lines.
- Wins are awarded for drawing 3, 4 or 5 symbols of a kind on an active bet way, from leftmost to right on consecutive reels.
- Only the highest win per line is paid.
- The maximum win amount is limited to 2500x bet. If the total win in a Free Spins round reaches 2500x, the round is immediately ended, the win is awarded and all remaining Free Spins are forfeited.
- When a Sticky symbol appears, the outcome of remaining non-sticky symbols is entirely random.
- Wins from different lines are added together.

SPECIAL FEATURES

WILD & GIANT CROWN

- Wild(Crown) and Giant Crown symbols substitute for all symbols except for FREE SPINS symbols.
- Every time the Wild symbol appears anywhere on the reels, it increases the Giant Crown counter by 1, starting from the

leftmost counter.
- When the counter is full, during the next paid spin the Giant Crown symbol appears on the reels, as indicated above the counter, increasing the chances for a winning combination:
  - Collecting 10 Wilds awards one drawing with the Giant Crown symbol on the three rightmost reels.
  - Collecting 20 Wilds awards one drawing with the Giant Crown symbol on the three middle reels.
  - Collecting 30 Wilds awards one drawing with the Giant Crown symbol on the three leftmost reels.
- When all counters are filled and three Giant Crown symbols appeared on the reels, the counters reset to 0 and have to be filled again.

FREE SPINS

- Drawing 3 FREE SPINS symbols anywhere on reels 1, 3 and 5 activates the Free Spins feature.
- FREE SPINS symbols may appear on the reels during the Free Spins feature, awarding additional 3 Free Spins.
- The number of Free Spins won, Multiplier value and Giant Crown position are randomly selected at the beginning of the Free Spins feature.
- 3, 5, 7, 9 or 12 Free Spins can be won.
- The following Multiplier values can be won: 1x, 2x, 3x, 4x or 5x.
- The Giant Crown symbol can be drawn on three leftmost, middle or rightmost reels or as a Walking Giant Crown. The Walking Giant Crown symbol moves one position to the right or left with each spin.
- The Giant Crown symbol is drawn during the first Free Spin and sticks to the reels untill the end of the Free Spins feature. All Sticky Giant Crown symbols are locked in place while other symbols are spun.

CHANCE LEVEL™

- The game is played with the base bet set by default.

- However, the Chance Level™ feature can be enabled during the base game and you can select one of 3 levels:
  - Chance Level™ x2 — the base bet is multiplied by 2, giving you at least a 2x higher chance of activating the Free Spins feature.
  - Chance Level™ x4 - the base bet is multiplied by 4, giving you at least a 5x higher chance of activating the Free Spins feature.
  - Chance Level™ x6 - the base bet is multiplied by 6, giving you at least a 8x higher chance of activating the Free Spins feature.
- The Chance Level™ feature does not affect the paytable, thus symbol values remain the same as for the base bet in both the base game and the Free Spins feature.
- When the Giant Crown symbol is being drawn during the base game, the Chance Level™ is deactivated and the game is reset to the base bet for one spin.

Ultra and Extreme Volatility
Using the Buy Feature, the Free Spins feature can be activated on Ultra and Extreme Volatility, characterized by even bigger wins than other Volatility Levels™.

VOLATILITY LEVELS™

Choose your favourite game style

Low volatility: The payouts you receive in this mode are more frequent but in most cases smaller. This level is perfect for players who prefer shorter game sessions.

Standard volatility: This mode is a mixture between Low and High and is dedicated to players who are looking to feel the thrill of big wins in a fair frequency.

High volatility: In this mode you can hit BIG WINs but they are not as frequent as winning in Low mode. High is an excellent mode for players who are not afraid of taking a risk to win big.

GAMBLE FEATURE

- The Gamble feature gives a chance to double each win.
- The Gamble feature can be activated only with the current win value during the ongoing game session.
- After activating the gamble feature, a player can:
  - take the win and end the gamble feature,
  - continue playing the gamble feature by selecting one of the two symbols.
- After selecting a symbol, a draw is made to determine the winning symbol.
- Each draw is independent of the previous one and has the same probability of winning.
- The player can end the gamble feature after each round.
- In the event of a loss, the player loses the win value specified in the current win counter and returns to the main game.
- The Gamble feature can be played for a total of 7 rounds.
- The number of rounds in the Gamble feature depends on the max win available in the game.
- The win value from doubling up in the next round cannot be higher than: 250,000

Current win — amount of win that can be taken.

Double to — win amount after a correct guess.
